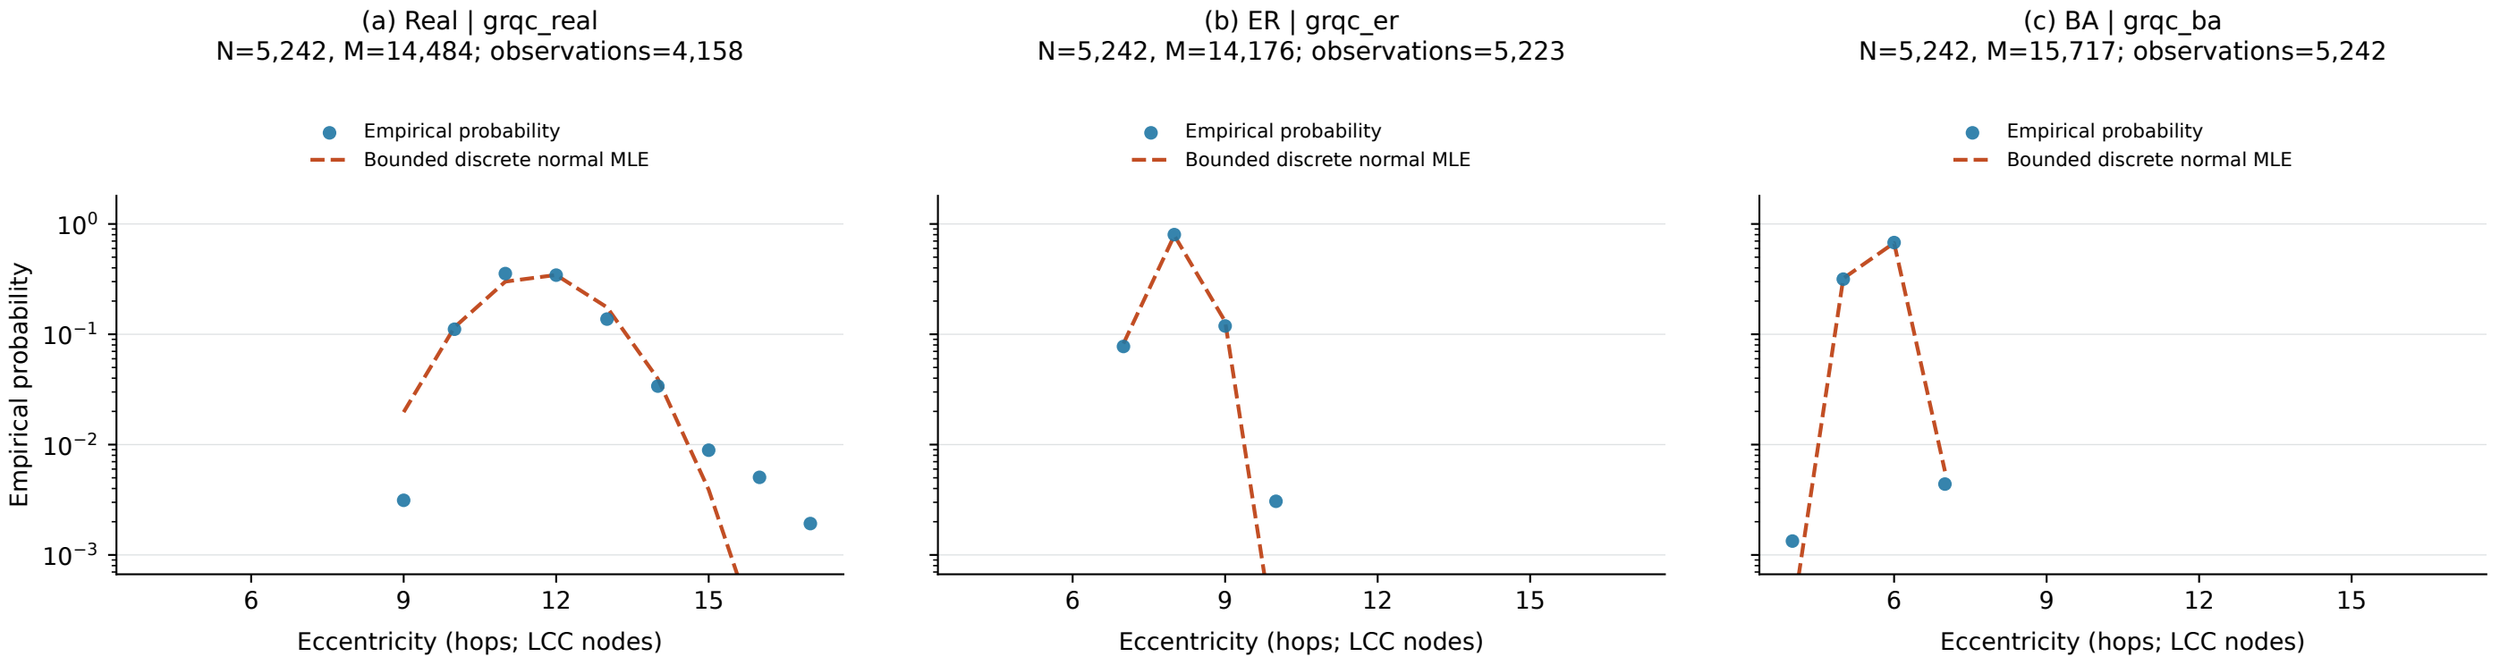
ca-GrQc | Eccentricity distribution



Bounded discrete normal MLE; KS=0.033.

Bounded discrete normal MLE; KS=0.009.

Bounded discrete normal MLE; KS=0.004.

Discrete PMF = count / observations; component observations are unweighted components, not nodes. Zero-valued observations are retained; empty-frequency bins are saved but not drawn on logarithmic y axes. Fits/smoothers are descriptive, not significance tests.
