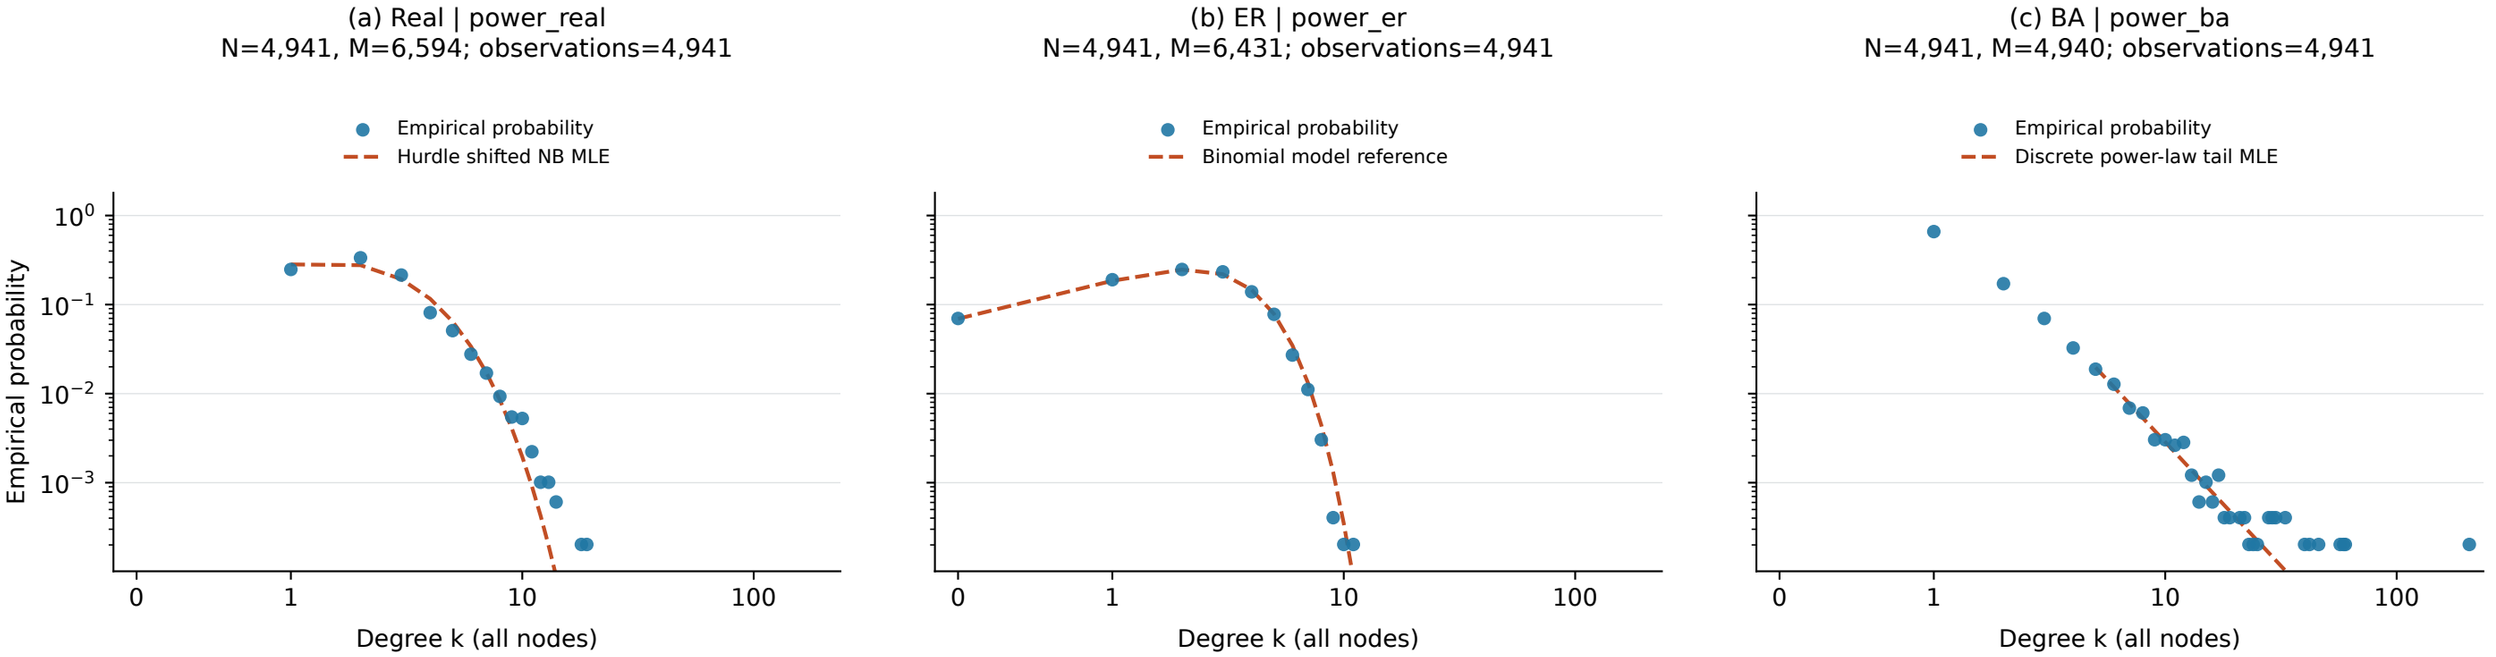
Western States Power Grid | Degree distribution



Hurdle shifted NB MLE; KS=0.046.

Binomial model reference; KS=0.020.

Discrete power-law tail MLE; KS=0.013. xmin=5, tail n=326, power-law alpha=2.78.

Discrete PMF = count / observations; component observations are unweighted components, not nodes. Zero-valued observations are retained; empty-frequency bins are saved but not drawn on logarithmic y axes. Fits/smoothers are descriptive, not significance tests.
